Projects

Among the standout projects are:

- 2D Game Engine and Editor for Non-programmers. Developed for my Bachelor's final project, in which I was responsible for the engine, written in C++. Link to the repository: https://github.com/ivasan07/ShyEngine

- 2D Survival Shooter Scroller Video Game called 'DOME'. Link to the repository: https://github.com/iquintasALT/DOME

- 3D Engine and game developed using it. Link to the repositories:

  Engine: https://github.com/Triturados/Motor
  Game: https://github.com/Triturados/Juego
